

1Breadcrumb

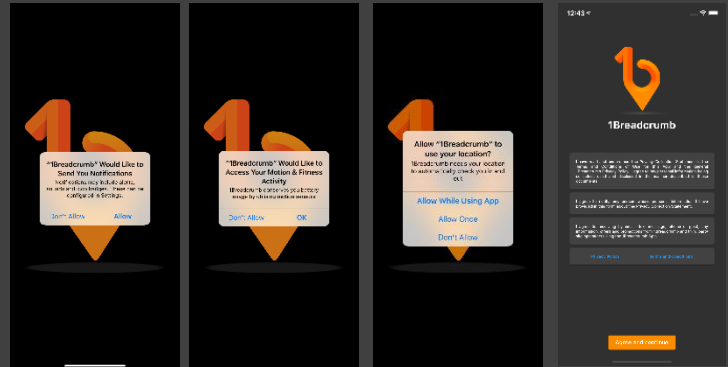

Getting Started With 1Breadcrumb

1Breadcrumb makes contact record keeping Safe & Simple.

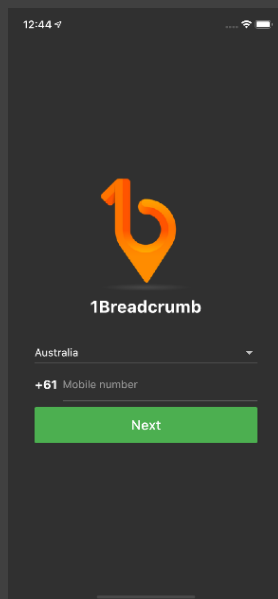

Step 1 - Download & Install 1Breadcrumb from either App Store or Google Play.

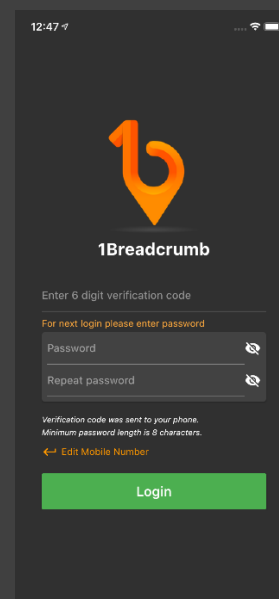

Step 2 - Click allow, ok and "Always allow while using the app" to the notifications and agree to the Terms & Conditions.

Step 3 - Begin creating your 1Breadcrumb profile by entering your mobile number

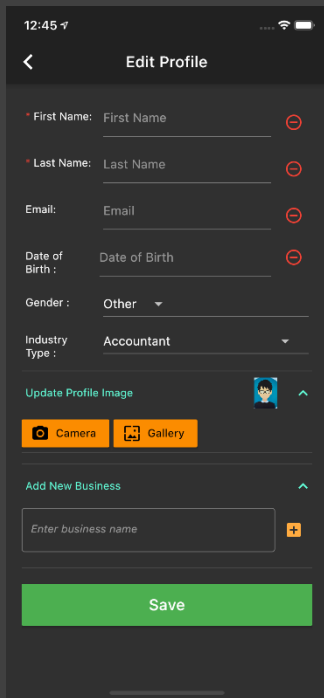

Step 4 - Enter your verification code and a password.

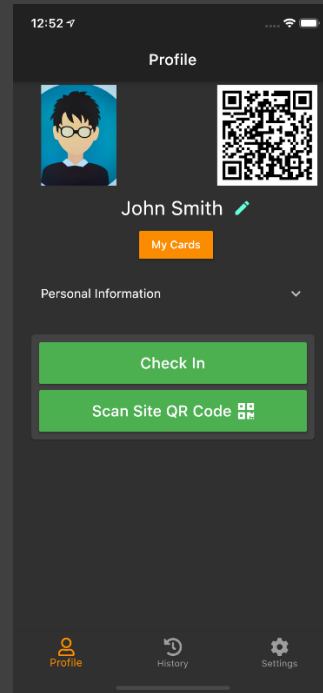

1Breadcrumb

Step 5 – Finalise your 1Breadcrumb profile creation by entering; Name, Email & DOB

Step 6 – Your 1Breadcrumb Profile setup is now completed, you can now check-in to the sites already setup by pressing the “Check In” button upon arrival to site.

**After the 1st check in at a site which needs to be manually completed, 1Breadcrumb will automatically check you in and out of this site.*

Frequently Asked Questions:

My profile is not automatically checking in & out of sites on my iPhone?

Please ensure that within your iPhone settings that you have 1Breadcrumb location settings set to “Always Allow”.

To do this navigate to the settings app, then “Privacy” -> “Location Services” -> “1Breadcrumb” - Ensure “Always” is selected.

Do I have to manually check in to every site I visit, or just once when I set up my account?

No, you will have to manually check-in to each individual site once, for the automatic check in & out feature to work.

I'm having issues, and the above guide isn't providing answers, where can I go for help?
