

Apple Location Services Requirement

Here at 1Breadcrumb we take privacy seriously, so too does Apple. A new feature with Apples most recent software update can hamper the 1Breadcrumb apps offering. This affects the Automatic check-in check-out function - to ensure this feature works, follow the below steps:

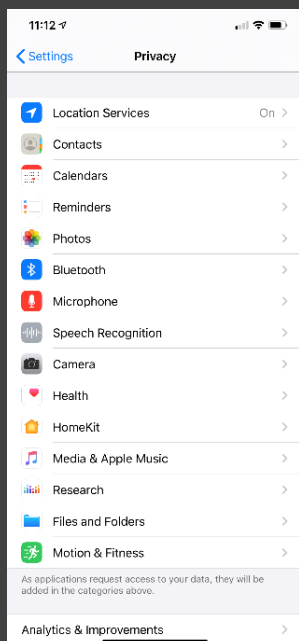

Step 1 - Navigate to the 'Settings' Application on your phone.

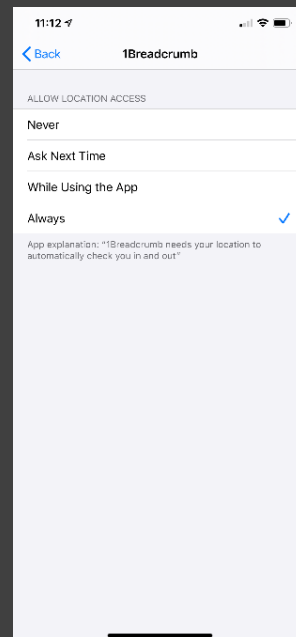

Step 2 - Scroll down to the setting marked 'privacy'

Step 3 - Select the first option 'Location Services'

Step 4 - Select the 1Breadcrumb App and ensure the setting is set to 'Always'

*If you're still having issues with ensuring that your application is automatically checking you in and out, please visit our website [help](http://help.1breadcrumb.com) page which has many alternative support resolutions.
